

Recognizing and Drawing Shapes

Today's Standard

2.G.A1 - Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.

Cues	Notes
What are the attributes of shapes?	Shapes have specific attributes like the number of sides and angles.
How can you identify different shapes?	You can identify shapes by counting their sides and angles.
What is the difference between 2D and 3D shapes?	2D shapes are flat and have length and width, while 3D shapes have depth as well.

Summary

Understanding shapes involves recognizing their attributes, such as the number of sides and angles, and distinguishing between 2D and 3D shapes.
