

Skip-Counting within 1000

Today's Standard

2.NBT.A2 - Count within 1000; skip-count by 5s, 10s, and 100s.

Cues	Notes
Skip-counting	Skip-counting helps students count within 1000 by 5s, 10s, and 100s.
Number line	Using a number line can visually show the intervals between numbers.
Base-ten blocks	Base-ten blocks can help students understand the value of digits while skip-counting.
Place value	Understanding place value is crucial for skip-counting and future mathematical concepts.
Starting points	Skip-counting can start from any number, not just zero.

Summary

Skip-counting by 5s, 10s, and 100s helps students count within 1000 and understand place value. Using tools like number lines and base-ten blocks can aid in mastering this skill.
