

Addition and Subtraction within 100

Today's Standard

2.NBT.B5 - Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.

Cues	Notes
Place value	Place value helps in understanding the value of digits based on their position.
Regrouping	Regrouping is used when the sum or difference in a column exceeds 9.
Order of operations	Following the correct order of operations is crucial in multi-step problems.
Addition strategies	
Subtraction strategies	Addition strategies include counting on, making ten, and using number lines. Subtraction strategies include counting back, finding the difference, and using number lines.

Summary

Fluent addition and subtraction within 100 involve understanding place value, using regrouping when necessary, and following the correct order of operations. Various strategies can be applied to solve these problems effectively.
