# Enhancing Presentations with Multimedia

## Today's Standard

5.SL.5 - Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes.

| Cues | Notes |
|---|---|
| What are multimedia components? | Multimedia components include graphics, sound, and visual displays. |
| Why use multimedia in presentations? | Multimedia can enhance the development of main ideas or themes in presentations. |
| How to choose relevant multimedia? | Choose multimedia that is directly related to the main idea or theme. |
| Common mistakes with multimedia | Avoid using too many or irrelevant multimedia elements. |
| Benefits of effective multimedia use | Effective multimedia use can make presentations more engaging and informative. |

## Summary

Using relevant multimedia components in presentations can enhance the communication of main ideas or themes. It's important to choose quality over quantity and ensure the multimedia elements are directly related to the content.
