

Text Information Presentation

Today's Standard

6-8.RH.5 - Describe how a text presents information (e.g., sequentially, comparatively, causally).

Cues	Notes
What are the different ways a text can present information?	Texts can present information sequentially, comparatively, or causally.
How does text structure impact meaning?	The structure of a text affects how information is understood and interpreted.
What is a sequential structure?	Sequential structure presents information in a specific order.
What is a comparative structure?	Comparative structure presents similarities and differences between items.
What is a causal structure?	Causal structure shows cause-and-effect relationships.

Summary

Understanding how texts present information helps in analyzing and comprehending complex texts by recognizing sequential, comparative, and causal structures.
