

Technology in Writing

Today's Standard

6-8.WHST.6 - Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

Cues	Notes
Technology in Writing	Using technology in writing involves more than just typing; it includes research, collaboration, and presentation. Digital tools like blogs, shared documents, and multimedia presentations enhance writing tasks. It's important to critically evaluate online sources for credibility and accuracy.
Digital Tools	
Evaluating Online Sources	

Summary

Using technology in writing enhances the production, publication, and presentation of information. Students should use various digital tools and critically evaluate online sources.
