

Using Multimedia in Presentations

Today's Standard

6.SL.5 - Include multimedia components (e.g., graphics, images, music, sound) and visual displays in presentations to clarify information.

Cues	Notes
Multimedia	Multimedia includes graphics, images, music, and sound.
Presentation Software	Presentation software helps integrate multimedia elements.
Clarify Information	Multimedia should clarify and support the information presented.
Common Misconceptions	More multimedia doesn't always mean better presentations.
Real-World Applications	Multimedia should not be used just for decoration.

Summary

Using multimedia in presentations helps to clarify and support the information. It's important to choose relevant and quality multimedia elements that enhance understanding.
