

Research Projects and Questioning

Today's Standard

7.W.7 - Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.

Cues	Notes
Research Projects	Research projects involve answering specific questions by gathering information from multiple sources.
Reliable Sources	Not all sources are equally reliable; evaluating the credibility of sources is important.
Question Refinement	Initial research questions should be refined based on gathered information.
Critical Thinking	Critical thinking is developed through analyzing and synthesizing information from various sources.
Inquiry-Based Learning	Inquiry-based learning encourages deeper understanding and continuous questioning.

Summary

Conducting research projects involves gathering information from multiple reliable sources and refining initial questions based on new information. This process develops critical thinking and inquiry-based learning skills.
