Event Analysis in Texts

Today's Standard

9-10.RH.3 - Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

Cues	Notes
What is the main idea of the standard?	The standard involves analyzing sequences of events in texts to determine causation.
How can we determine causation in a text?	Look for textual evidence like cause-effect phrases to determine if one event caused another.
What are common misconceptions about event sequences?	Misconception: All earlier events cause later events. Reality: Not all sequences imply causation.
What are real-world applications of this standard?	Applications include analyzing historical events, literature, and news articles.

Summary

This standard teaches students to analyze event sequences in texts to determine causation, avoiding common misconceptions and applying their skills to real-world contexts.
