

Research Projects and Inquiry

Today's Standard

9-10.WHST.7 - Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Cues	Notes
What is the standard?	The standard involves conducting research projects to answer questions or solve problems.
Why is it important?	It helps develop critical thinking and research skills.
How do you evaluate sources?	Evaluate sources by checking author expertise, publication date, and publisher reputation.
What is a research project?	
What are common misconceptions?	A research project involves gathering and synthesizing information to answer a question. Common misconceptions include thinking all sources are credible and that one source is enough.

Summary

This standard focuses on conducting research projects, evaluating sources, and synthesizing information. It is essential for developing critical thinking and research skills.
