

## Research Projects and Inquiry

### Today's Standard

9-10.W.7 - Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Cues	Notes
Research	Research involves answering questions or solving problems through systematic investigation.
Inquiry	Effective research requires formulating clear, focused questions.
Sources	Utilize a variety of sources: books, journals, interviews, credible websites.
Synthesis	Synthesize information from multiple sources to demonstrate understanding.
Iterative Process	Research is an iterative process; refine questions and approaches as new information is gathered.

### Summary

Research projects require systematic investigation to answer questions or solve problems. Effective research involves using diverse sources, synthesizing information, and refining questions based on new insights.
