Classifying and Counting Objects

Today's Standard

K.MD.B3 - Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.

Cues	Notes
What is classifying?	Classifying involves grouping objects based on shared characteristics.
How do we count objects?	Counting objects means determining the number of items in a group.
Why is sorting important?	Sorting helps us organize and make sense of the world around us.
What are common mistakes?	Common mistakes include thinking categories must be equal and confusing sorting with counting.

Summary

Classifying and counting objects are key skills in early mathematics, helping students organize and understand data.
