

Understanding Teen Numbers

Today's Standard

1.NBT.B2b - The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones.

Real-World Applications for this Standard

Counting objects in groups of ten and some more; Understanding money with dimes and pennies; Reading and writing numbers from 11 to 19; Comparing quantities in everyday situations; Using number lines to identify teen numbers

Today I Learned

Today, I learned that the numbers from 11 to 19 are made up of a ten and some more ones. For example, 14 is one ten and four ones.

Common Stumbling Blocks

Some kids might think that teen numbers are just single digits in a row. Others might not realize that 10 is part of the teen numbers. We can use tools like ten frames and number lines to help understand.

Quiz Me

- What is 11 made of?
- How many ones are in 13?
- What number comes after 14?
- How many tens are in 19?
- Show me 12 using your fingers.

Help Me

Teen numbers are the numbers from 11 to 19. They are made up of one ten and some extra ones. For example, 15 is one ten and five ones. You can see this in real life when you count things like dimes and pennies or use a number line.
