

## Digital Writing Collaboration

### Today's Standard

1.W.6 - With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers.

### Real-World Applications for this Standard

Using a tablet to write and illustrate a story with a classmate.; Creating a class blog where students can post their writing.; Using a word processor to write a thank-you letter to a community helper.; Collaborating on a digital presentation about a favorite book.

### Today I Learned

Today, I learned about using digital tools to write and publish my work. We also practiced working together with our classmates.

### Common Stumbling Blocks

Some kids might think digital tools are just for games, but they're great for learning too! Others might think they have to do everything by themselves, but it's okay to ask for help and work with friends.

### Quiz Me

- What can we use digital tools for in writing?
- How can you work with a friend on a writing project?
- Why is it important to ask for help from adults?
- Can you name a digital tool we used in class?
- What did you write about today using a digital tool?

### Help Me

We use digital tools like tablets to write stories and letters. These tools help us make our writing look nice and share it with others. Working with friends and asking adults for help makes our writing even better.
