

## Addition and Subtraction within 1000

### Today's Standard

2.NBT.B7 - Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.

### Real-World Applications for this Standard

Calculating change during shopping; Adding and subtracting distances in a trip; Balancing a simple budget; Combining or separating groups of items

### Today I Learned

Today, we learned how to add and subtract numbers up to 1000. We used blocks and drawings to help us understand.

### Common Stumbling Blocks

Sometimes, kids might not line up the numbers correctly when adding or subtracting. Another mistake is forgetting to carry over or borrow numbers.

### Quiz Me

- What is place value?
- How do you add big numbers?
- What do you do if you run out of ones?
- Why is it important to line up numbers?
- What is borrowing?

### Help Me

When we add or subtract big numbers, we can think about real-life situations like shopping or traveling. For example, if we buy things that cost different amounts, we can add up the prices to find out how much we spent. If we need to find out how much more money we need, we can subtract what we have from the total

cost.
