

Technology in Collaborative Writing

Today's Standard

3.W.6 - With guidance and support from adults, use technology to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.

Real-World Applications for this Standard

Using word processors to write and edit stories.; Collaborating on group projects using online tools.; Publishing class newsletters or blogs.; Creating digital presentations.; Participating in online writing forums.

Today I Learned

Today, I learned how to use technology to write and share my stories. I can type on a computer and work with my friends online to make our stories even better!

Common Stumbling Blocks

Sometimes, kids might think that computers are only for typing the final version of their stories. But we can use computers to help with all parts of writing, like planning and editing. Another tricky part is working with friends online. It can be just as good as working together in class!

Quiz Me

- What can you use a computer for when you're writing?
- How can you work with your friends using a computer?
- What is one tool you can use to plan your writing?
- Why is it important to use technology for writing?
- Can you tell me one way you can share your writing online?

Help Me

Using technology to write and share your stories is really helpful! You can use a computer to plan, write, and make your stories better. You can also work with your friends online to make your stories even more awesome. This is just like how people use computers at work to write and share their ideas.
