

Analyzing Relationships in Texts

Today's Standard

5.RI.3 - Explain the relationships or interactions between two or more individuals, events, ideas, or concepts in a historical, scientific, or technical text based on specific information in the text.

Real-World Applications for this Standard

Compare and contrast the roles of key figures in a historical event.; Analyze the cause and effect in a scientific discovery.; Describe the sequence of steps in a technical process.

Today I Learned

Today, we learned how to find and explain connections between people, events, and ideas in different texts, like history or science books.

Common Stumbling Blocks

Kids often think all relationships are clearly stated in the text, but sometimes they need to use clues to figure them out. They also might think all texts are organized the same way, but there are different ways to organize information.

Quiz Me

- Who are the key people in the text?
- What happened because of this event?
- How are these two ideas connected?
- What clues help you understand the relationship?
- What type of text structure is used here?

Help Me

Understanding connections in texts is like solving a puzzle. You look at different pieces of information to see how they fit together. This helps you understand the whole picture better, like how scientists figure out how things work or how historians understand past events.
