Logical Sequencing in Presentations

Today's Standard

5.SL.4 - Report on a topic or text or present an opinion, sequencing ideas logically and using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.

Real-World Applications for this Standard

Presenting a book report to the class; Sharing a personal story with clear details; Explaining a science project with logical steps; Debating a topic with supporting evidence; Describing a historical event in sequence

Today I Learned

Today we learned how to make a good presentation. We need to put our ideas in order and use clear details to explain them.

Common Stumbling Blocks

Sometimes kids might think that just saying a lot of facts is enough, but it's important to put them in a clear order. Also, speaking too fast can make it hard for others to understand.

Quiz Me

- What is a main idea?

- Why do we need to put ideas in order?

- What happens if we talk too fast?

- How can we make our ideas clear?

- What is a supporting detail?

Help Me

When we make a presentation, we need to think about the order of our ideas. For example, when telling a story, we start with what happened first, then what happened next. This helps people understand us better.
