

## Logical Idea Presentation

### Today's Standard

6.SL.4 - Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.

### Real-World Applications for this Standard

Presenting a science project in class; Giving a book report; Participating in a debate; Explaining a concept during a group discussion; Delivering a speech at a school assembly

### Today I Learned

Today, we learned how to present ideas clearly. This means speaking so everyone can understand and looking at people when we talk.

### Common Stumbling Blocks

Sometimes, kids think talking louder is better than talking clearly. They also might think they should only look at one person when talking. Both of these ideas are not correct.

### Quiz Me

- What should you do with your eyes when talking?
- Is it better to talk loud or clear?
- Why is it important to use facts when you talk?
- What can you do to make sure people understand your ideas?
- How should you organize your ideas when you talk?

### Help Me

When talking to people, it's important to speak clearly so they understand you. Look at different people, not just one person. Use facts and details to explain your ideas and make sure they are in a good order.
