

Using multimedia in presentations

Today's Standard

8.SL.5 - Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.

Real-World Applications for this Standard

Creating a PowerPoint presentation with images and videos to support a book report; Using graphs and charts in a science fair project presentation; Incorporating audio clips in a history presentation to provide historical context; Designing infographics to summarize research findings in a class project; Using video clips to enhance a persuasive speech

Today I Learned

Today, we learned how to use pictures, videos, and other fun tools to make our presentations better. This helps us explain our ideas clearly and keeps our audience interested.

Common Stumbling Blocks

Sometimes, kids might think that any picture or video will make their presentation better, but that's not always true. Another common mistake is using too many pictures or videos, which can make the presentation confusing.

Quiz Me

- What can you use to make your presentation more interesting?
- Why is it important to choose the right pictures or videos?
- What happens if you use too many pictures or videos?
- Can you name a tool you can use in a presentation?
- Why do we use pictures and videos in presentations?

Help Me

Using pictures, videos, and other tools can help make your presentation better. These tools can help explain your ideas clearly and keep people interested. For example, if you're talking about a book, you can show pictures from the story or a video of someone reading it. This makes your presentation more fun and easier

to understand.
