

Building and Drawing Shapes

Today's Standard

K.G.B5 - Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.

Real-World Applications for this Standard

Creating a house model using sticks and clay balls.; Drawing different shapes found in the classroom.; Building a car using building blocks.; Constructing a simple bridge using craft materials.

Today I Learned

Today, we learned how to make and draw shapes using things like sticks and clay balls. This helps us see shapes in the world around us.

Common Stumbling Blocks

Sometimes, kids might think that all shapes with the same name look exactly the same. Another problem is thinking that shapes can't be put together to make new shapes.

Quiz Me

- What are some basic shapes you know?
- Can you draw a circle for me?
- What can you use to make a square?
- Can you show me how to make a triangle using sticks?
- What happens when you put two triangles together?

Help Me

Shapes are everywhere! You can make and draw shapes like circles, squares, and triangles. For example, you can use sticks to make a square or draw a triangle on paper. This helps you see and understand shapes in the world around you.
