

Basic Addition and Subtraction

Today's Standard

K.OA.A2 - Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.

Real-World Applications for this Standard

Counting apples to find the total number.; Using toy cars to demonstrate subtraction.; Drawing pictures to solve word problems.; Playing board games that involve adding and subtracting spaces.; Using fingers to represent numbers and operations.

Today I Learned

Today, we learned how to solve addition and subtraction problems using objects or drawings. This helps us understand math better.

Common Stumbling Blocks

Sometimes, kids think the order of numbers in subtraction doesn't matter, but it does. Also, they might think subtraction always makes a number smaller, which isn't always true.

Quiz Me

- What is 5 plus 3?
- If you have 7 apples and eat 2, how many are left?
- Draw a picture to show 4 plus 2.
- What happens if you take 6 away from 6?
- Can you show 3 plus 4 with your fingers?

Help Me

We use math in real life to solve problems. For example, if you have 5 toy cars and get 3 more, how many do you have now? Or if you eat 2 cookies from a plate of 6, how many are left?
