

## Making 10 with Numbers

### Today's Standard

K.OA.A4 - For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation.

### Real-World Applications for this Standard

Using ten-frames to find pairs that make 10; Counting objects like blocks or beads to make 10; Drawing pictures to illustrate pairs that add up to 10; Using fingers to visually represent numbers that add up to 10; Playing games that involve combining numbers to make 10, such as card games

### Today I Learned

Today, we learned how to find two numbers that add up to 10. This helps us understand addition better.

### Common Stumbling Blocks

Sometimes, kids think only numbers next to each other can make 10. They might also find it hard to understand without seeing or touching objects.

### Quiz Me

- Can you find two numbers that add up to 10?
- What do 4 and 6 make when added together?
- How about 3 and 7?
- Can you draw two groups of things that make 10?
- What happens when you add 5 and 5?

### Help Me

Finding two numbers that make 10 helps us in real life. For example, if you have 4 apples and you need 10, you know you need 6 more. This is called making 10.
