

## Asking and Answering Questions

### Today's Standard

K.SL.3 - Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

### Real-World Applications for this Standard

Students asking questions to understand a story read aloud.; Children seeking help from a teacher or peer during a classroom activity.; Students clarifying instructions for a task or project.

### Today I Learned

Today we learned how to ask and answer questions to get help, find information, or understand something better.

### Common Stumbling Blocks

Sometimes kids think asking questions means they don't know enough, but asking questions is really important for learning. Another problem is giving answers that don't really answer the question. We need to listen carefully and give good answers.

### Quiz Me

- Can you ask me a question about your favorite book?
- What do you do if you don't understand something?
- How do you ask for help?
- Why is it important to answer questions correctly?
- Can you think of a time when you asked a question to learn more?

### Help Me

Asking and answering questions helps us learn new things and understand better. For example, if you don't know how to do a puzzle, you can ask for help. If you're curious about how a toy works, you can ask questions to learn more.
